Indian Answer to a Challenge .- I bave we objections to this duel affair. The one is, lest I should hurt you, and the other is, lest you should hurt me. I do not see any good it would do me to put a bullet through any part of your body. I could make no use of you when dead, for any culinary purpose, as I would of a rabbit or a turkey. I am no cannibal, to feed on flesh of men; why then shoot down a human creature of whom I could make no use ? A buffalo would be better meat : for though your flesh might be delicate and tender, yet it wants that firmness and that consistency which takes and retains salt. At any rate it would not be fit for long voyages. You might make a good English stew or an American barbacue, it is true, being of the nature of an opos sum : but people are not in the habit of barbacuing any thing human in these en-lightened times. As to your hide, it is not worth taking off, being little better than a yearling colt. As to myself, I don't like to stand in the way of any thing nful. One of the latter then passes over the bridge, and singles out the maiden he has and they leave the place together. The same ceremony continues, perhaps, for taked off; as it rarely occurs that any one is left without a partner. At the next cabaret, a pledge is given in a bumber that the parties will remain true to each other during the following year.

American Stockings .- The Boston Cour ier says that the Stockings manufactured at the Newburyport Factory in Massachunetts, are quite equal to the imported, for atrength and durability, and can be afforded equally as cheap. The factory employs a capital of about three thousand dollars only; it has thirty frames for weaving stockings, all of which are wrought by females. The enterprising proprietor has orders as fast so he cal supply them. The stockings spoken of are made of Sea Island Cotton, threethreaded, and can be retailed for about sixty cents; they are said to be actually worth one third more than imported hose at that price.

A friend has politely trenslated the following interesting article from a late number of Le Courier des Etats Unia.
THE YOUNG NAPOLEON-WATCHED.

Mesers. Barthelemy and Mery wishing to do homage to the Duke de Reichstadt, (the Young Napoleon) resolved on presenting him with a copy of their last work entitled Napoleon in Egupt. With this view one of them set out for Vienns, in the hope of having an interview with him. and addressing Limself to Mr. Dietrichstein, his principal teacher and governor. made known to him the object of his journey, and begged that he would second his ws. The teacher in answer said :--Bessesured, Sir, that the Prince neither hears, sees, nor reads any thing but what we think proper he should read, hear or see, and if by any chance he should receive a letter, note, or book, which escaping our vigilance, should fall into his hands without our knowledge, believe me that his first care would be to deliver it to us without opening it; be would not read a line in it, until we had told him that he might do so without danger." Hence it appears, Count, (the teacher) that the son of Napoleon is by no means so free as we in France supposed him to be. Answer : "The Prince is not a prisoner, but .. his situation is peculiar. Have the

questions, I cannot snewer them to your satisfaction; you had better abandon the idea that brought you hither: I repeat that it is impossible." All entreaties were useless: Mr. Die-

gether the writer of this communication, and a highly respectable gentleman, (W. B. Lawrence; Eegr. lete charge de affaire at London) who had jute returned from Europe, where, for some years past, he had been bonoured with the connducte of our generalment, in the diplomatic service of his country; he had remined to this city on business, connected paired to this city on business, connected with his late mission, and, in a casual convenation, diclosed, without any reserve, some facts elucidating the intellectual traits of the President's character, so directly in point, and in refutation of the ex-tract at the head of this communication, that It is but an act of sheer justice, and imparative duty, to make it known.

"During an intenview with the Presi-

dent" said Mr. —, "I was reluctant to lead on the conversation that passed belead of the conversation that passed be-tween us, from the disparaging reports. I had beard of his intellectual powers and from an apprehension I might introduce topics on which he was not prepared to discourse; therefore, at first, I merely responded briefly and generally to his en-quiries. But judge of my pratification when I found I was in the presence of an intel-lected and materiating individual, gifted ilgent and penetrating individual, gifted with conversational powers of a high order. My recent arrival from Europe naturally led to some remarks on the politial condition of that quarter of the globe, all condition of that quarter of the gave, and to the topic of the war between the Russians and Turks. On this subject he was perfectly well informed, evincing as exact knowledge of the positions of the contending armies, the marches, and their countermarches, the advantageous posts of each-in fine there are very few individuals, with the assistance of a map on the table before them, who could have traced, with the same accuracy, clearness and precision, the movements of the Turks, now on the borders of the Balkan and Black Sea. This fact is probably the nore vivid and impressive on my mind, as I had so lately conversed with some of the most acute observers and statesmen in Europe, on the same subject, who from the deep interest they take in the contest. are in the minutest degree, acquainted with the same particulars, and are so much nearer the theatre of war, and the sources of correct information. After this interesting and unexpected conversation, I must confess that I took my leave with a very different impression of the President's intellectual standing (and take pleasure in saying so) than when first entered the executive mansion."

The foregoging is in substance, cor-rectly reported. The reader will form his estimate of its worth. During the heat of the late Presidential canvass, when many newspapers were acting, not from the responsible convictions of principle, out as the political attorneys of a party, whatever was then uttered derogatory to Gen. Jackson's qualifications, a due re gard for our constituted authorities, for ruth, for the happy estate which God has given us, should, at this time, induce all true Americans on this point, to make the amende honorable, and " nothing extenuate nor set down aught in malice," touching our NATIONAL CHARACTER.

Lord Ellenborough has resigned the privy seal, and Lord Rosslyn succeeds. The resignation of the first was occasioned by the unhappy affair which has destroyed that nobleman's peace to witwartzenburg. They were overtaken, it is true, and the lady carried to her father, Admiral Digby, but she is a sullied flower, " when lovely woman stoops to folly," &c. She was one of the fairest flowers of the British Court, a most incomparable woman, as regards person and accomplishments. She is not twenty-two yet, being not half the age of his lordship. The fatal indiscretion excites little talk, for her siddiness and levity has long been the subject of animadversion, and her fall expected as certainly as the fall of stocks afer the opening of a gloomy Budget.

The late JOSEPH WILSON, Esq.

Amidst the rei crated " triumphs of the mb," the melancholy intelligence of the death of Joseph Wilson, Esq. will be received by a numerous circle of acquain-tances and friends, with feelings or deep and sincere sorrow. The following anecdote,--- which was told to the friend who has attempted this imperfect sketch, as a tribute of regard and affection to the memory of one who will be long remembered, --- strongly illustrates the frank and open character of the deceased. Mr. Wilson was a member of the committee appointed for the purpose of laying off this state into Congressional Districts after the census of 1810, and which still continue. It was the object of each of the political parties (as it always will be at a time of such ex citement) so to arrange the districts as to gain more or less the accendancy in our delegation to Congress. The bill was reported, arranging the Districts very nearly as they now stand. In the course of the debate that ensued, a gentleman of the opposition denounced the bill as tending exclusively to increase the then dominant party, and offered a substitute, having a contrary effect. Mr. Wilson pointed out the object and tendency of the substitute, (which the mover denied and then very candidly and frankly avowed that his object was to increase the strength of his own party; and if the effect it in a still greater degree, he would adopt it, to the exclusion of every federal member from the State. This candid avowal, and frank mode of acting, contributed, in no small degree, to raise him in the estimation of his own party, and to challenge the respect of those to whom he was opposed. At this session he was elected Societter for the Western Circuit. This election was the more honorable, as

If Mr. Penn and such friends as himself and Mr. Kincaid, and the Reporter, Focus, &c. &c. wish to injure Mr. Barry, Mr. Van Buren, or any one else, by a misconstruction of my declarations, they will surely take my positive avowal on the subject as the better evidence."

John Jackson ... This man, who has somehow gained a factitious consequence, far beyond what his character or capacity would entitle him to. has been most effectually "done up" by the U. S. Telegraph. It was through fraud and deception that he got the appointment of Consul for the Island of Martinique; consequently when the character of the man, and the meens used to obtain the appointment, were fully developed, his commission was very properly revoked. But this was not, as has been charged, done on account of his political sentiments; for it was distinctly known before he received the armointment, that he had been a supporter of M Adams's election; -(and this circumstance another evidence of the fasity of the charge by prompt and energetic character, which still live to mourn his premature death. the coalition papers, that the administration marked his future course. Detiorable.....In our last, it was with a peculia satisfaction we commented on the refraining at the late elections in this state, of the people from the ordinary disgusting scenes of drunkenness and debauchery; but if the following extract from the Wilmington (North Carolina) Reporter, be a faithful representation of the scenes enacted in that town at the election, all our fond anticipations are blasted; and we shall still have to mourn over the depravity of our people, in the exercise of the most inestimable of their privilege as freemen, -- the elective franchise :

"There were seven open houses, three grog shops, two boarding houses, where the gentlemen voters could regate themselves with something to eat and drinks and last, though not least, two dance houses---where the gentlemen voters, after having refreshed themselves during the day at the grog shops and hoarding houses, could retire at its close and under cover of night, to spend the time until the return of day, in the most conditions mixed together, in the most levely confusion."

The President's Health is represented by the ast accounts, to be restored. Indeed, at n time has he been any thing worse than in ordinary cases of summer complaints,—although contrary reports have been industriously put affort by the coalition papers, for sinister purposes. The U. S. Telegraph of the 28th uit, says that letters from the President to his family, represent his health as fully restored; and he would return to Washington in a few days.

The Raleigh Register states, that Gold has been discovered, in two or three different places, in that (Wake) county.

Destructive Rains, -It is with regret we learn, that the heavy rains with which we were visited in this section of country week before last, have done extensive damage. In Davidson county, we are told the injury done to the standing crops, to mills, bridges, gold-mining establishments, &c. by the swelling of the water-courses, and overflowing of the low-lands, has been very serious. It has been so excessively wet and rainy, for same weeks past, that the farmers will lose a good proportion of their fodder.

Dull Times,—The Cheraw Radical has been discontinued, at the end of the first year of its existence. The editor says he has not stopped for lack of patronage, and we will not gainsay his declaration; but then we have our own opinion about the matter: Every body knows, that in these dull times it is as rare an occurrence for man to give up a lucrative business, as it is to witness an Eclipse of the sun or moon. But as the latter is actually to take place, (if we can credit the Almanac, and a correspondent of ours two or three weeks back) on the 13th inst. it may be that the former phenomenon has been exhibited in the conduct of the Editor of the Radical. It is but a few years back, that there were two papers published in Cheraw; both of which seemingly received a living support. Now we are unable to divine the cause of these mutations in the business at Cheraw.

Can it be a fair criterion whereby to judge of the declination of business in that once flourish ing town? Or are people becoming so little covetous of the honors incident to the Editorial vocation, and so little ambitious of acquiring disrepublican freedom of intercourse, with function in that way, as to be cautious of advenwhite, jellow and black; all colors and turing in such hazardous enterprises, without estimating the cost, profits, &c. Cheraw, in our view of the business, is not the only town where two newspapers have been started, when the petronage would hardly warrant the profitable continuance of one.

The Vermont Journal, also, printed at Windson the oldest paper in the state; the Journal of the Times, at Bennington; and Freedom's Banner, at Chester; all in Vermont,-have been discontinued, for want of support.

An inquiry is now going on at Paris as to the titles purchased by Frenchmen and foreigners at Rome. Many of the possessors of these titles are found to be persons of light character, who having become marquesses, counts, barons, and knights, by purchase of the Pope's secretary, set themselves up for fine gentlemen in Paris, and practice a good deal of deception on the unwary. These titles are disposed of there by an agent, at something like the following prices; for a marquesate 20,000 francs, for a barony or a countship 12,000, and for a knighthood 3,000. The apostolic party wish to force the King into an alliance with the Princess of Sardinia, who is said to be young and beautiful, and withal a great devotee. The moderate party, which is composed of the Princess Donna Isabella, (wife of Don Francisco Paula, and sister of the Dutchess de Berri, of France,) and the younger and more numerous of the courtiers, are very desirous that Ferdinand should marry the Princess Donna Christiana, daughter of the King of Naples, who is also said to be young and very beautiful. LLYMIAN SONG,

Ly a Maribidan in 1716, and address

English Lady.

The most that Protoch's summit deck,
They are not chiter than thy neck;
And youdge blue and cloudless sky
Can rival not thine asure eye?
The golden chain thy bosom bears
than thy golden hairs;

et's downy dress

The golden chain thy bosom bears

The golden chain thy downy dress

The golden chain thy downy dress Breet almonds that have lost their a Hast thou a husband?—Happy He! O! give him shildren like to thee.

This tong is from LA Gunla, a happy imitation the digram composition; they resemble the lervies and Bosnian in their measure and maner. This song is a very happy orientalization of mple and natural praise.

She stood breast-high smid the corn, Or reap'd by the golden light of morn; Like the sweetheart of the sun, Who many a burning kins hath won.

On her cheek an autumn flush Deeply ripen'd-such a blush in the midst of brown was born,

Bound her eyes her tresses fell---Which were largest none could tell; But long lashes veil'd a light Which had else been all too bright.

And her hat with shady brim, Made her forehead darkly dim: Thus she stood among the stooks, Praising God with her sweet looks.

Sure, I said, Heaven did not mean Where I reap thou should'st but gleam; ay thy sheaf adown, and come, hare my harvest and my home. BOAS.

Joaluh, Chapter Exist. 20, 21. Come, my people! thy Salvation Side thee to thy chambers fly, Till the flery indignation, Till the tempest passes by :

Fears within thee..-fees without thee; in thy covert still abide; Haste, and shut thy doors about thee, For a little moment hide.

Lo! the Lord his plans forsaking, Treads in wrath the battle plain; Earth to her foundations shaking, Shows her blood, nor hides her slain

MISCELLANY.

EFFECTS OF DISSIPATION From the Columbia Star.

The extract which follows, is from one of the tales of "The Good woman," by Paulding. The history is that of a young man, who descended by the regular gradations of vice, to the very depths of guilty and infa-mous dissipation. A youth of forgrees; wasted his own patrimony by the children one look, and me another, gambling, then reduced his sisters to poverty by his injustice and dishoneaty; married; destroyed the happiness of his family, shattered the reason of his lovely wife, by his unhallow.
